

BOSCH BMW 1,3,5,6,7 & X Series Ignition Coil

0221504464 The original BMW "snap" in coil used a catch mechanism to connect to the spark plug. It has now been superseded for some time now with part number 0221504470. This new design connects to the plug with HV bush in coil and contact spring so the customary "snap" is no longer heard. nor is it an indication that the coil has been properly installed. This new design does, however, provide better coil performance at the spark plug connection point. Both part numbers are in stock as well as a comprehensive range of BOSCH engine management products, fuel pumps & sensors.

Genuine OE Pressure Sensor Glow Plugs - Vauxhall Astra, Insignia & Zafira 2.0 CDTi

The PSG measures the pressure in the combustion chamber with an integrated sensor and reports this to the engine control electronics. This innovative concept will play a key role in the further reduction of diesel emissions.

Electric Water Pumps

These water circulation pumps are a rotary pump with a D.C. motor and have a solenoid operated coupling. They are now fitted to some of the latest models below as well as many others.
