

## Waterless Wash & Wax and Hard Surface Cleaner / Quick Polish. Fantastic Results on Paint Work, Aluminium, Chrome and Superb on Glass

Showroom Magic is suitable for paintwork, chrome, glass, plastics, vinyl, wheels and most hard surfaces. A blend of surfactants, wetting agents and lubricants emulsifies dirt, grime and contaminants lifting them from the surface without scratching and repels water.

On a vehicle use microfibre cloths, surface can be dry or damp on light to moderate dirt. Spray as little as possible (do not over apply) onto the panel/window. Rather than circle or wipe back and forward move the microfibre in one direction and lift the dirt. Swap to a clean cloth and buff haze to a shine as normal. (Not to be used on under foot surfaces)

**Business** - Use as a quick polish, glass cleaner, interior and exterior plastic cleaner, great on alloy wheels.

**Home use** - As above plus brilliant on windows, glass cabinets, TV stands, shower tiles, cooker tops, chrome / aluminium products plus much more.
