What is Dipetane?

Dipetane is a 100% hydrocarbon product, Dipetane burns the carbons that would normally cause carbon deposit build-up, therefore extending both your oil and engine life. Proven in over 100 million miles of service, Dipetane improves fuel economy, reduces emissions, extends oil life and reduces engine wear.

Why choose Dipetane?

- Save up to 10% on fuel bills and cut pollution by 25%
- Dipetane helps to pass the MOT emission tests.
- Cleans and burns away carbon deposits from the combustion chamber.
- Reduce your maintenance costs.
- Proven performance in Europe, USA, Australia, Korea, and China.

How to use!

- Simply fill up your vehicle with an amount of litres of fuel and then pour in the corresponding amount of Dipetane, e.g. for 40 litres of fuel pour in 4 units of Dipetane.
- Each division on the 1 litre bottle treats 10 Litres.
- Each bottle of Dipetane treats 200 litres of any fuel type.
- Use Dipetane for 2 to 3 fuel fill-ups to gain the full benefits.
- There is no danger from putting in too much Dipetane.
- Dipetane is designed for continuous use.

Part No.DP001 - £12.00 inc. vat
