

**We Supply Nitrogen**  
**Cylinders 10 & 20 Litres**  
Prices From £36.00 + vat  
(+ surcharge)

**R134A AIR CON MACHINE CONSUMABLES**

Applied into the vehicles air con system via integrated dispenser system

AIR CON MACHINES AVAILABLE

**PAG OILS**  
**250ml BOTTLE**  
£4.20 Per Bottle  
41-1020 ISO46  
41-1022 ISO100  
41-1021 ISO150

OR USE

**1LTR Universal Refrigerant / Pag Oil PAO68**  
Covers ISO46,100,150  
41-1068  
£13.46

**1LTR Universal Refrigerant / Pag Oil PAO68 With UV Dye**  
Covers ISO46,100,150  
41-1068A  
£17.39

**1L Vacuum Pump Oil - Used to maintain the vac pump in the actual Air con machine.**  
41-0004  
£8.87

**R134A & R1234YF UV Leak Dye**  
250ml 33 dose  
42-0000A £13.70

**R134A Gas 12kg**  
AC12KG-SP  
2018 PRICE TBA  
**R1234YF Gas 5kg** £517.26

**R134A UV Leak Dye Gun Cartridge**  
24 doses -  
42-0001 £18.80

41-1117  
£19.60

**Leak Locator Spray**  
Spray on air con system to find leaks

**Comma Air Con Cleaner**  
Eliminates Odours 150ml  
AIRCC £6.86

SEASSP34  
£4.43

**R134 & R1234YF Hybrid UV Leak Dye 250ml 33 dose**  
42-0018 - £16.50

**1 1/4 X 13mm Low Side Charge Port Adaptor**  
41-1130 £3.15

**1 1/4 X 16mm High Side Charge Port Adaptor**  
41-1132 - £3.66

**R1234YF PAG OIL 250ml BOTTLE** 41-1025  
£6.94

**System Leak Seal**  
Apply via ports 40g  
41-0002A  
£17.29

**Universal O Ring Set 250 Piece**  
43-AAG0357  
£18.10

**LED UV Dye Detection Torch & Glasses Set**  
41-0037 £29.00

**Nitrotrace - Hydrogen Leak Detection Test Kits**

Nitrogen is the usual method for leak testing by observing the drop in pressure on a test gauge it is possible to verify if there is a leak, but not where the leak is located. Nitrogen can not be detected using an Electronic leak detector. NitroTrace is blended with Hydrogen additive. Hydrogen has the smallest atom of all gasses, and will leak through the tiniest of leak sources. It also enables the leak to be located by the use of a special electronic leak detector.

**Ideal for testing R134 & R1234YF - £386.67**
